

## PARTH AJIT SALUNKHE

### Software Engineer Intern

+91 8527837059 | parth.ajit7052@gmail.com | LinkedIn | GitHub | Delhi, India

**PROFESSIONAL SUMMARY** Computer Engineering student at Delhi Technological University (GPA: 7.0/10) with strong expertise in full-stack web development, SaaS architecture, and applied AI agentic workflows. Proven ability to build scalable backend systems, automate enterprise data pipelines, and develop high-performance secure applications utilizing Python, FastAPI, and React.

**TECHNICAL SKILLS** **Programming Languages:** Python, C++, JavaScript, TypeScript **Frontend & Frameworks:** React 18, Vite, Tailwind CSS, FastAPI, Node.js **Databases & Platforms:** Google Cloud Platform (GCP), DigitalOcean, Heroku, Vercel, Docker, Linux, Redis, SQLAlchemy **Others:** Model Context Protocol (MCP) Servers, Agentic Workflows, Autonomous LLM Agents, Nuitka, Git

### PROFESSIONAL EXPERIENCE

#### Software Engineering Intern Alfazance Dubai, UAE

May 2025 – Jun 2025

- Architected Microsoft Power Automate workflows to eliminate manual data entry tasks, decreasing daily processing time from 1 hour to 15 minutes (a 75% reduction) while ensuring strict data accuracy.
- Engineered the integration of 1TB+ client datasets into Elasticsearch, enabling real-time enterprise reporting capabilities and achieving a 25% improvement in reporting efficiency.
- *Technologies Used: Microsoft Power Automate, Elasticsearch, Python*

#### IT Infrastructure Intern TLS IT Solutions Dubai, UAE

Jun 2022 – Jul 2022

- Executed large-scale server setups and configurations across 3 different server stacks, managing 20-30TB servers to optimize infrastructure for high-availability enterprise environments.
- *Technologies Used: Linux, Hardware Configuration, Networking*

### PROJECTS

**CodeVault** 2026 Engineering a full-stack SaaS platform that compiles applications into secure native C binaries to prevent reverse engineering.

- Built native compilation pipelines for Python and Node.js utilizing Nuitka to ensure high-grade code security for individual developers.
- Architected a scalable backend utilizing FastAPI and Redis to manage enterprise licensing workflows, including offline leases and hardware ID locking.
- Deployed an autonomous AI marketing agent using OpenClaw on DigitalOcean to programmatically generate and schedule promotional content.

**Asura Security Scans** 2025 Developed an AI-powered vulnerability analysis tool utilizing multi-engine security scanners.

- Created a multi-engine security scanner integrating Bandit, Safety, and Semgrep, successfully reducing vulnerability detection time by 50%.
- Added OpenRouter API for AI-generated vulnerability explanations and developed an A–F health scoring system to simplify remediation for end-users.

### EDUCATION

**Bachelor of Technology in Computer Engineering** | Expected: 2027 | Delhi Technological University (DTU) |

**High School Diploma** | 2023 | Our Own High School
