EDUCATION

Delhi Technological University (DTU) <i>B.Tech in Computer Engineering (GPA: 7.0 / 10)</i> <i>Selected Coursework:</i> Data Structures & Algorithms, Object Oriented Programming, Database Systems, Computer Networks	Delhi, India <i>Expected Graduation: 2027</i>
Our Own High School <i>High School Diploma</i>	Dubai, UAE <i>Graduated: 2023</i>

TECHNICAL SKILLS

Languages:	Go, Python, C++, JavaScript, TypeScript, SQL
Web & Backend:	React 18, Vite, FastAPI, Node.js, Playwright, ConnectRPC, REST APIs, WebSockets
DevOps & Infra:	Docker, Google Cloud Platform (GCP), Linux, GitHub Actions CI/CD, Proxmox, Vercel
Databases & Caching:	PostgreSQL, SQLite, Redis, Elasticsearch
AI & Machine Learning:	PyTorch, OpenCV, MediaPipe, RAG, Embeddings, Multimodal LLM Fusion, Agentic Workflows
Cybersecurity:	LLM Agent Planning, Threat Intel APIs (AbuseIPDB, AlienVault OTX), Semgrep, Bandit

PROFESSIONAL EXPERIENCE

Alfazance <i>Software Engineering Intern</i> - Architected automated data flows using Microsoft Power Automate, eliminating manual administrative processes. - Engineered client data ingestion pipelines into Elasticsearch, enabling real-time analytics and system monitoring. - Developed Dynamics 365 automation triggers and analytics dashboards to track key operational indicators.	Dubai, UAE <i>May – June 2025</i>
TLS IT Solutions <i>IT Infrastructure Intern</i> - Assisted in enterprise-scale server setups, hardware configurations, and network infrastructure routing. - Resolved hardware and network performance issues, maintaining high system availability.	Dubai, UAE <i>June – July 2022</i>

SAAS & SYSTEMS PROJECTS

LastResort — Autonomous Web Penetration-Testing Agent <i>Systems & AI Security Project</i> - Designed an autonomous web security agent in Go utilizing an LLM planning loop (Gemini) to dynamically construct custom exploit payloads on demand, shifting away from standard static signatures. - Engineered live exploit validation with Playwright, verifying vulnerabilities via real browser DOM state and script alerts, reducing false positive reports by 95% compared to raw HTTP response matching. - Built a persistent SessionJournal in SQLite tracking detailed accessibility tree (AXTree) nodes and history, enabling the agent to execute complex multi-step exploits over stateful navigation flows.	Go, Playwright, ConnectRPC, SQLite <i>2026</i>
NeuroBrain — AI CRO & Creative Attention Platform <i>Computer Vision & Multimodal LLM Platform</i> - Engineered a CV pipeline predicting consumer visual fixation maps on marketing creatives, turning attention coordinates directly into layout recommendation edits. - Fused PyTorch-based visual attention maps with OCR coordinate mapping, compiling layout metadata into multimodal LLM prompts to produce specific, actionable design modifications. - Optimized a FastAPI backend supporting parallel batch image uploads, reducing creative evaluation latency to under 15 seconds.	FastAPI, PyTorch, React, Python <i>2025</i>

CERTIFICATIONS & ACHIEVEMENTS

- Google Cybersecurity Certificate** (2025)
- 1st Place** – Emirates Aviation Rocket-Building Competition (Dubai, UAE)
- Top 5 Global Team & Best Presentation** – ICMTC (UGVC Category, Cairo, Egypt) for UGV Tech Team
- Top 5 Winner** – DTU Hackathon 2024 (Delhi Technological University)
